

Gain Real Project Experience

We believe in tapping into our intern's strengths and providing them with an opportunity to learn, grow, and—most importantly—add value. Our interns are exposed to various aspects of our business and work alongside experienced staff members to make meaningful contributions on real projects.

Construct your future. Join our team.

INTERNSHIPS @CUPERTINO ELECTRIC

Summer internships at Cupertino Electric are typically located in our California locations: San Jose, San Francisco, and Southern California, and select project locations throughout the country. Start dates can be flexible around your school schedule. Potential interns should submit resumes and cover letters before April 1 of the year that they are interested in interning with Cupertino Electric. Interns can apply during one of our college campus visits or by sending a resume and cover letter to Cupertino's University Relations contact, Kathy Abbott, at internships@cei.com.

INTERNSHIP FACTS

- Candidates should be fourth or fifth-year undergrads, post-graduate students, or recent graduates in good academic standing.
- Consideration is given to interested candidate, with preference for those in construction management, electrical engineering, or related business majors, or those with electrical engineering experience.
- Summer Interns typically work full-time hours between June and September, for 10 to 12 weeks.
- Cupertino Electric internships offer competitive pay and resources to help locate housing if needed.
- Interns are often considered for repeat internships or long-term employment, since our program is designed to identify high-potential prospective employees.
